## **Copper North Mining Corp.**

Notes to the Condensed Interim Consolidated Financial Statements

For the three months ended March 31, 2015 (unaudited – prepared by management)

(Expressed in Canadian dollars)

### **1. NATURE OF OPERATIONS AND GOING CONCERN**

#### **a) Nature of operations**

Copper North Mining Corp. (together with its subsidiaries, “Copper North” or the “Company”) was incorporated in British Columbia, Canada on August 3, 2011 and is directly engaged in the exploration and development of mineral properties in Canada.

Copper North began trading on the TSX Venture Exchange on October 24, 2011. The Company's head office is located at 1120 – 1095 West Pender Street, Vancouver, BC.

#### **b) Going concern**

The nature of the Company's operations requires significant expenditures for the acquisition, exploration, and development of mineral properties. To date, the Company has not received any revenue from mining operations and is considered to be in the exploration stage. The Company's operations have been primarily funded from equity financings. The Company will continue to require additional funding to maintain its ongoing exploration programs, permitting efforts, advance royalty and property maintenance payments, and operations.

While these consolidated financial statements have been prepared using International Financial Reporting Standards applicable to a going concern, which assumes the realization of assets and settlement of liabilities in the normal course of business as they come due, certain conditions and events result in a material uncertainty casting significant doubt on the validity of this assumption. For the three months ended March 31, 2015, the Company reported a loss of \$606,470 and as at that date had a working capital deficit of \$30,694 and an accumulated deficit of \$15,552,644. The Company's ability to continue as a going concern is dependent upon its ability to obtain additional funding from loans or equity financings or through other arrangements. The Company has been successful in securing financing in the past, but there can be no assurance that it will be able to do so in the future. Further detail of the Company's financing transactions for the three months ended March 31, 2015 is available in notes 4 and 5.

These consolidated financial statements do not reflect the adjustments to the carrying values of the assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumptions deemed to be inappropriate. These adjustments could be material.

### **2. BASIS OF PRESENTATION**

#### **a) Compliance with International Financial Reporting Standards**

These financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board. The financial statements have been prepared under the historical cost convention.

These financial statements were approved for issue by the Company's board of directors on May 14, 2015.

**b) Significant accounting estimates and judgments**

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates, and assumptions that affect the application of policies and reported amounts of assets and liabilities and disclosures of contingent assets and contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Significant items that require estimates as the basis for determining the stated amounts include the recoverability of exploration and evaluation assets, environmental obligations, the valuation of share-based payments, and the allocation of financing proceeds. Actual results could differ from those estimates. Differences may be material.

The recoverability of the carrying value of exploration and evaluation assets is dependent upon a number of factors including the existence of economically recoverable reserves and the Company's ability to secure and maintain title and beneficial interest in the properties, to obtain the necessary financing to continue the exploration and future development of the properties, or to realize the carrying amount through a sale or partial disposal. Realization values may be substantially different from carrying values as shown.

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers, or title may be affected by undetected defects.

The fair value estimates used to assess recoverability of the Company's exploration and evaluation asset carrying values are developed using management's projections for long-term average commodity prices for copper, gold and silver; recoverable reserves and resources; operating costs; capital expenditures; reclamation costs; applicable foreign currency exchange rates; and potential sale proceeds. Management makes estimates relating to current and future market conditions. There are inherent uncertainties related to these factors and management's judgment when using them to assess the recoverability of exploration and evaluation assets.

The Company believes that the estimates applied in the assessment of recoverability are reasonable; however such estimates are subject to significant uncertainties and judgments. Although management has made its best estimate of these factors based on current conditions, it is possible that the underlying assumptions can change significantly and impairment charges may be required in future periods. Such charges could be material.

**3. EXPLORATION AND EVALUATION ASSETS****a) Carmacks (Yukon, Canada)**

The Company owns 100% of the Carmacks Project, an oxide copper, gold, and silver deposit located in Yukon, Canada.

Any production from the Carmacks Project is subject to either a 15% net profits interest or a 3% net smelter return royalty, at Copper North's election. If Copper North elects to pay the net smelter return royalty, it has the right to purchase the royalty for \$2.5 million, less any advance royalty payments made to that date. At March 31, 2015, \$1.2 million has been paid in advance royalty payments. The Company is required to make an advance royalty payment of \$100,000 in any year in which the average daily copper price reported by the London Metal Exchange is US\$1.10 per pound or greater.

**Copper North Mining Corp.**

Notes to the Condensed Interim Consolidated Financial Statements

For the three months ended March 31, 2015 (unaudited – prepared by management)

(Expressed in Canadian dollars)

The Company holds a Guaranteed Investment Certificate in the amount of \$80,300 in safekeeping for the Yukon Government. This amount represents the estimated reclamation cost for the work performed to date on the property. The security will be released once the Company performs its obligations pursuant to its Quartz Mining License.

**b) Thor (British Columbia, Canada)**

The Thor property is located south of the Kemess South mine-mill complex in North Central British Columbia.

On July 8, 2014, Copper North entered into an acquisition agreement with Electrum Resource Corporation (“Electrum”). Pursuant to the acquisition agreement, the Company will earn 100% interest in the Thor property by making the following payments and incurring the following exploration expenditures. If the Company fails to make a scheduled payment of cash or common shares, it will retain no interest in the Thor property.

Payment Date	Cash payment	Common shares	Exploration expenditures (cumulative)	Status
July 8, 2014	\$25,000	1,000,000	-	<i>Completed</i>
July 8, 2015	\$50,000	-	\$200,000	<i>Expenditures incurred</i>
July 8, 2016	\$50,000	1,000,000	\$700,000	-
July 8, 2017	\$100,000	1,000,000	\$1,500,000	-
July 8, 2018	\$100,000	1,000,000	\$2,500,000	-
July 8, 2019	\$100,000	1,000,000	\$3,500,000	-
July 8, 2020	\$100,000	-	\$5,000,000	-
TOTAL	\$525,000	5,000,000	\$5,000,000	

In addition, Electrum will receive a 2% net smelter return royalty to a maximum of \$5 million. The Company agrees to pay an advanced royalty payment of \$1 million at each of the seventh, eighth, ninth, tenth and eleventh anniversaries of the acquisition agreement if commercial production is not attained in respect of the Thor Property before those dates. Advance royalty payments are deductible from the maximum amount of payable pursuant to the net smelter return royalty.

**c) Redstone (Northwest Territories, Canada)**

Copper North owns 100% of the Redstone property. The Redstone property comprises mining leases and mineral claims in the western part of the Northwest Territories. Should production be achieved on the mining leases, the mining leases are subject to a net smelter return royalty of between 3% and 4% depending on the monthly average of the final daily spot price of copper reported on the New York Commodities Exchange relating to each production month, as follows:

- 3% if the price is less than, or equal to US\$0.75 per pound;
- 3.5% if the price is greater than US\$0.75 per pound, but less than or equal to US\$1.00 per pound; and
- 4% if the price is greater than US\$1.00 per pound.

## 5. WARRANTS AND STOCK OPTIONS

### a) Warrants

- i) In November 2014, Copper North announced a warrant exercise incentive program to encourage the early exercise of warrants issued as part of the April 24, 2014 private placement. As part of the program, the Company amended the terms of the warrants issued in April 2014, such that each holder who exercised such warrants by November 24, 2014 would receive an additional ½ warrant.

The Company completed the warrant exercise incentive program on November 25, 2014. 7,000,000 of the 13,180,000 warrants issued in April 2014 were exercised for gross proceeds of \$490,000. Each warrant issued on November 25, 2014 entitles the holder to acquire one common of the Company at an exercise price of \$0.06 until November 25, 2016.

Warrants issued in April 2014 not exercised by November 24, 2014 continue to be exercisable for only common shares of the Company on the original terms.

**7. RELATED PARTY TRANSACTIONS****a) Related party loan**

On May 7, 2013, the Company entered into a loan agreement (the "Loan") with Dale Corman, Copper North's Chairman, to secure funds of \$300,000. The Loan accrued interest at a rate of 8% per year. In consideration of the risk taken by Mr. Corman, the Company also agreed to issue shares equal to 20% of the principal amount of the Loan.

On June 23, 2014, the Company paid \$43,000 in cash and issued 6,860,000 common shares to Mr. Corman to settle amounts owing under the terms of the Loan. The value of the common shares was recorded at \$0.05 per share, the shares' fair value on the settlement date. Costs to settle the Loan totaled \$4,090.

**b) Deferred salary**

Sally Eyre, Copper North's previous Chief Executive Officer, and Julien Francois, Copper North's Chief Financial Officer, entered into agreements with the Company to defer payment of salaries from April 1, 2013 to September 30, 2013. The deferred salaries accrue interest at 8% per annum. The Company has also agreed to pay a one-time bonus equal to 20% of the deferred salaries owing on September 30, 2013. The Company may pay the deferred salaries, accrued interest, and bonus in cash or common shares of Copper North. The Company has not made any payments towards the salary deferral agreements.

Sally Eyre, Copper North's previous Chief Executive Officer, and Julien Francois, Copper North's Chief Financial Officer, deferred their salaries from October 1, 2013 to February 28, 2014 for no additional compensation. The Company accrued these wages but the amounts are still outstanding.

Harlan Meade, the Company's Chief Executive Officer, deferred a portion of his salary during the three months ended March 31, 2015 for no additional compensation. The Company has accrued these wages in the statement of loss.

### **10. CAPITAL MANAGEMENT**

Copper North is a mineral exploration and development company with a primary focus of advancing the Carmacks Project, the Thor property and the Redstone property. Its principal source of funds is the issuance of common shares. The Company considers capital to be equity attributable to common shareholders, comprised of share capital, contributed surplus, and deficit. It is the Company's objective to safeguard its ability to continue as a going concern so that it can continue to explore and develop its projects. As at March 31, 2015, certain conditions and events cast significant doubt upon the Company's ability to continue as a going concern. Refer to note 1(b) for more information.

Copper North manages its capital structure based on the funds available for its operations and makes adjustments for changes in economic conditions, capital markets and the risk characteristics of the underlying assets. To maintain its objectives, the Company may attempt to issue new shares, seek debt financing, acquire or dispose of assets or change the timing of its planned exploration and development projects. There is no assurance that these initiatives will be successful.

Copper North monitors its cash position on a regular basis to determine whether sufficient funds are available to meet its short-term and long-term corporate objectives.

There has been no change in the Company's capital management practices during the period. Copper North does not pay dividends. Neither the Company nor any of its subsidiaries is subject to externally imposed capital requirements.

### **11. FINANCIAL INSTRUMENT RISK**

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company has exposure to liquidity and credit risk from the use of financial instruments. Financial instruments consist of cash and cash equivalents, other assets, reclamation bond, amounts due to related parties, and accounts payable and accrued liabilities.

#### **a) Liquidity risk**

Liquidity risk is the risk that the Company will be unable to meet its financial obligations as they come due. Certain conditions cast significant doubt on the Company's ability to meet its financial obligations. Refer to note 1(b) for more information regarding the Company's liquidity risk.

#### **b) Credit risk**

Financial instruments that potentially subject the Company to credit risk consist primarily of cash and cash equivalents. These financial instruments are at risk to the extent that the institutions issuing or holding them cannot redeem amounts when they are due or requested. To limit its credit risk, the Company uses a restrictive investment policy. It deposits cash and cash equivalents in Canadian chartered banks.

In addition, amounts prepaid or on deposit may not be recovered. To limit this risk, the Company takes into account the financial condition of the vendor and the services to be provided before making such deposit or prepayment.
